Trigano Jardin : Lots of fun in the garden... with innovation too!

A visionary family company for more than 80 years

The story began in 1935 when the Trigano family started selling their own brand of textiles and clothing. The year after, French people started going on paid holidays for the first time, and Trigano provided them with their first tents: these were the early days of camping.

Very quickly the company would symbolize holidays, getting away from it all, and freedom. Trigano has succeeded in carving out a place for itself and is chosen by millions of Europeans who are constantly looking for new sensations and who want to get closer to nature.

How? By listening to their needs and adapting to changes in society!

Manufacturing freedom

The **Trigano** groups' know-how, its determination to innovate and its targeted growth strategy led to it becoming the European reference in terms of leisure vehicles and outdoor recreational equipment.

A success story "Made in France"

The company which benefitted from joining the Trigano Group in 1992 has become a key player in the European outdoor games market.

Sylvain Gauthier, Technical Director

" Our sustainable development policy and our strategy are to be, and to remain a French manufacturer. We started to manufacture in-house some products that had been outsourced, and by doing so we created jobs, we obtained the OFG label (French Origin Guaranteed) and were also awarded the FSC certification (Forest Stewardship Council). Thanks to the strength of our determination we have become the biggest European manufacturer of outdoor games for children.

*We offer our customers innovative, well designed quality products at a competitive price. **The EVO products are a perfect example of that!** "*
